

3CTN Portfolio User Search Guide

1. Purpose

The purpose of the 3CTN Portfolio Search Page is to allow users to view and search for studies included in the 3CTN Portfolio.

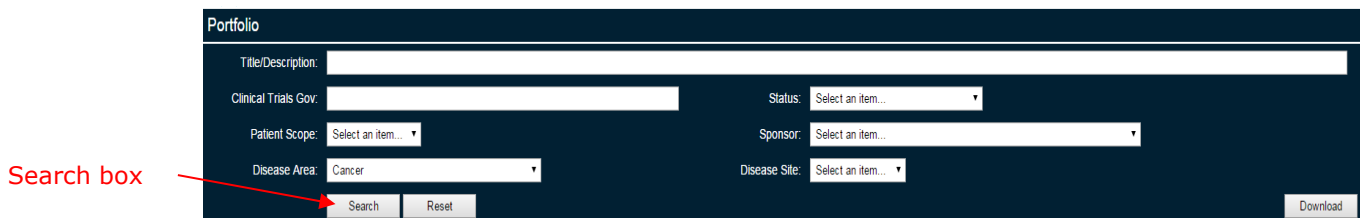

2. Overview

The 3CTN Portfolio Search Page is open access and does not require a login. It is available at:

- www.3ctn.ca/page/portfolio or Portfolio section on the 3CTN website (<http://www.3CTN.ca>);
- Click the **Search the 3CTN Portfolio** button.

In the 3CTN Portfolio, studies are categorized using a three-tier classification. At the highest level, studies will be assigned to cancer (disease area); within cancer, they are then assigned to disease sites. At the lowest level, studies are associated with specific disease types.

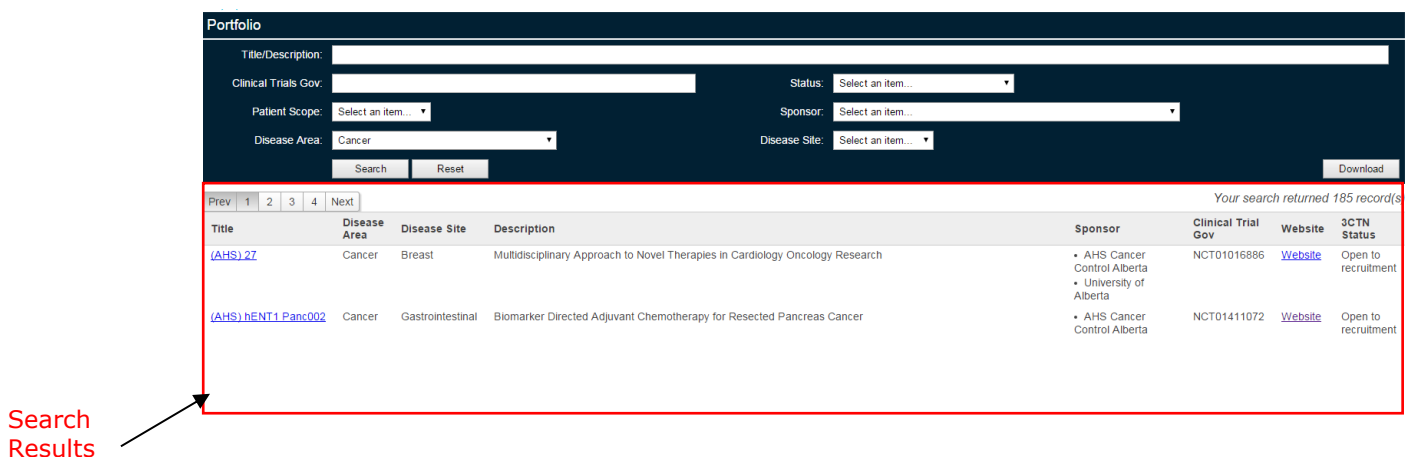

The initial page of the portfolio will only display the search box shown in the following screenshot. The bottom of the page is reserved for search results and will be automatically populated once the search criteria is entered.

Search box

The screenshot shows a search form with the following fields: Title/Description, Clinical Trials Gov., Patient Scope, Disease Area, Status, Sponsor, and Disease Site. There are Search and Reset buttons, and a Download button on the right.

The search box shown above should enable you to find the relevant studies matching your criteria. To view the complete listing of portfolio trials, click the "search" button without setting a search criteria. The portfolio list will be displayed as below.

Search Results

The screenshot shows the search results page with a table of results. The table has columns for Title, Disease Area, Disease Site, Description, Sponsor, Clinical Trial Gov, Website, and 3CTN Status. The search returned 185 records.

Title	Disease Area	Disease Site	Description	Sponsor	Clinical Trial Gov	Website	3CTN Status
(AHS) 27	Cancer	Breast	Multidisciplinary Approach to Novel Therapies in Cardiology Oncology Research	• AHS Cancer Control Alberta • University of Alberta	NCT01016886	Website	Open to recruitment
(AHS) hENT1 Panc002	Cancer	Gastrointestinal	Biomarker Directed Adjuvant Chemotherapy for Resected Pancreas Cancer	• AHS Cancer Control Alberta	NCT01411072	Website	Open to recruitment

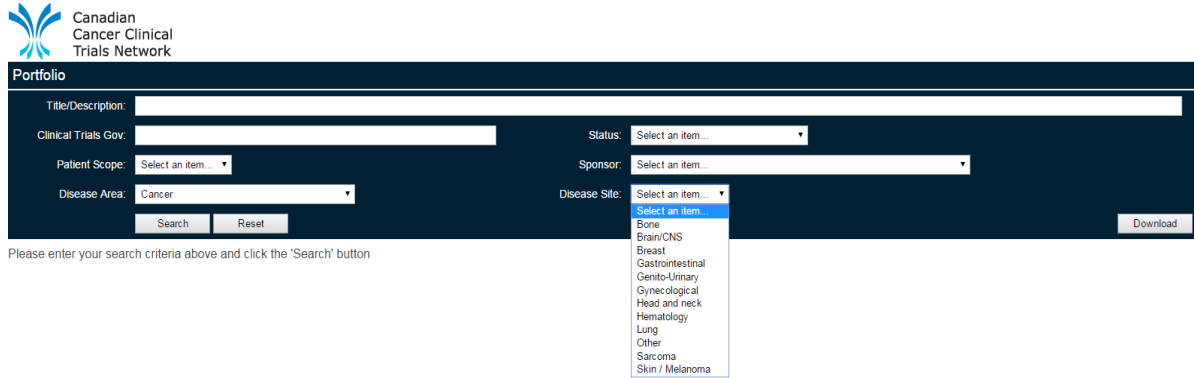

3. Search Criteria

The portfolio can be searched by using keywords of the study title/description, the assigned clinicaltrials.gov number, disease sites, patient scope, status and sponsor.

Definitions are listed in Appendix A. You can download the search results to excel for further analysis.

3.1. Dropdown Lists: Search by Disease Site

The search engine is defaulted to cancer. Clicking on the disease site in the search box will return a list of trials in different disease site.

Portfolio

Title/Description:

Clinical Trials Gov:

Status:

Patient Scope:

Sponsor:

Disease Area:

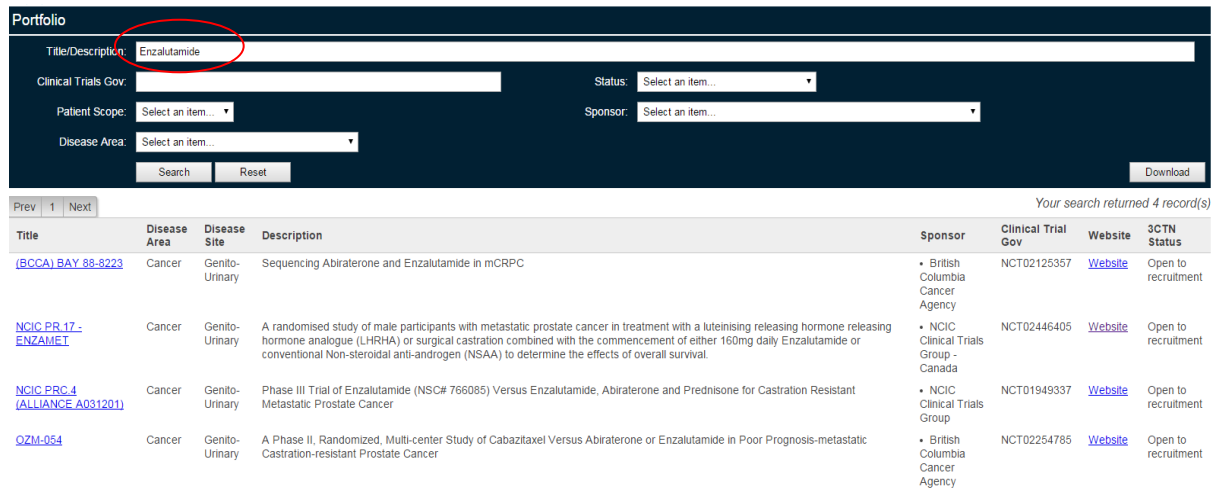

Disease Site:

- Select an item...
- Bone
- Brain/CNS
- Breast
- Gastrointestinal
- Genito-Urinary
- Gynecological
- Head and neck
- Hematology
- Lung
- Other
- Sarcoma
- Skin / Melanoma

Please enter your search criteria above and click the 'Search' button

3.2. Text Fields: Search by Title and ClinicalTrials.gov Number

Search by entering the keywords of the title and/or clinicaltrials.gov number. The following is an example:

Portfolio

Title/Description:

Clinical Trials Gov:

Status:

Patient Scope:

Sponsor:

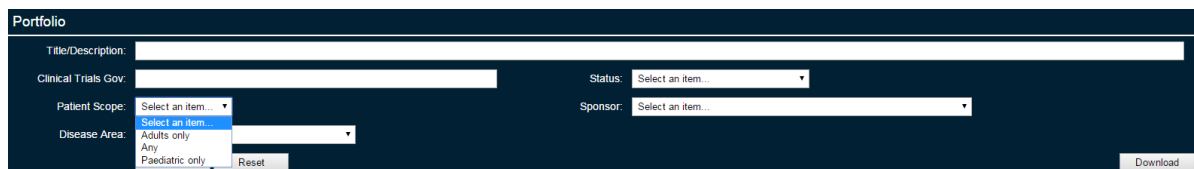

Disease Area:

Prev 1 Next Your search returned 4 record(s)

Title	Disease Area	Disease Site	Description	Sponsor	Clinical Trial Gov	Website	3CTN Status
(RCCA) BAY 88-8223	Cancer	Genito-Urinary	Sequencing Abiraterone and Enzalutamide in mCRPC	British Columbia Cancer Agency	NCT02125357	Website	Open to recruitment
NCIC PR 17 - ENZAMET	Cancer	Genito-Urinary	A randomised study of male participants with metastatic prostate cancer in treatment with a luteinising releasing hormone releasing hormone analogue (LHRHA) or surgical castration combined with the commencement of either 160mg daily Enzalutamide or conventional Non-steroidal anti-androgen (NSAA) to determine the effects of overall survival.	NCIC Clinical Trials Group - Canada	NCT02446405	Website	Open to recruitment
NCIC PRC 4 (ALLIANCE A031201)	Cancer	Genito-Urinary	Phase III Trial of Enzalutamide (NSC# 766085) Versus Enzalutamide, Abiraterone and Prednisone for Castration Resistant Metastatic Prostate Cancer	NCIC Clinical Trials Group	NCT01949337	Website	Open to recruitment
OZM-054	Cancer	Genito-Urinary	A Phase II, Randomized, Multi-center Study of Cabazitaxel Versus Abiraterone or Enzalutamide in Poor Prognosis-metastatic Castration-resistant Prostate Cancer	British Columbia Cancer Agency	NCT02254785	Website	Open to recruitment

3.3. Dropdown Lists: Search by Patient Scope

Clicking on the patient scope, you can filter the list by Paediatrics patient only, Adult only or Any (for both pediatric and adult patients).

Portfolio

Title/Description:

Clinical Trials Gov:

Status:

Patient Scope:

- Select an item...
- Adults only
- Any
- Paediatric only

Sponsor:

Disease Area:

3.4. Dropdown Lists: Search by Status and Sponsors

Clicking on the status in the search box will return a list of trials in different stages.

Appendix A: Terms and Definitions

Project: It is equivalent to a “trial”. In this Portfolio, it is usually an academic cancer clinical trial.

Title: It is usually the Sponsor Initials plus Sponsor Protocol ID.

Sponsor: List of Sponsors for the project. Project may have more than one sponsor. The primary sponsor is usually the holder of the Clinical Trials Application (CTA).

Status:

- **Concept:** The study is in its conceptual phase and no development work has started.
- **Development:** The study protocol is currently in development and no submission has been made.
- **Feasibility:** The proposed study is undergoing an evaluation to assess its potential.
- **Project in set up:** The study is currently undergoing ethics or governance approval.
- **Withdrawn:** The sponsor has withdrawn the study to site participation prior to enrolment of the first subject.
- **Active, but not recruiting:** The sponsor has opened the study for site participation, but no site is yet open to recruitment.
- **Open to recruitment:** The study sponsor has opened the study to recruitment.
- **Suspended:** The study sponsor has suspended subject enrolment for interim analysis, but may start again.
- **Terminated:** The study sponsor has prematurely stopped the study before completion.
- **Closed to recruitment – in follow up:** The study site has reached target or is no longer recruiting patients. All recruited patients have now completed treatment and are in the process of standard follow up.
- **Closed –Follow Up Complete:** The study is closed to recruitment. All patients have completed the standard follow up and have been discharged.
- **Completed:** The study has ended normally and is closed all activities. All participants are off-study (that is, the “last subject”, “last visit” has occurred).
- **Archived:** The historical records for the study have been accumulated and have been stored.
