## 1.0 PURPOSE

This Standard Operating Procedure (SOP) describes the procedures for completing a Material Transfer Agreement (MTA) for transferring a biospecimen from the biorepository to a researcher.

## 2.0 SCOPE

Depending on the individual or organization the material is being transferred to, specific MTAs may be used. The sequence of the steps outlined below may vary slightly to accommodate diversity in the practice of when the MTA is completed.

## 3.0 RESPONSIBILITIES

This SOP applies to all qualified biorepository personnel responsible for completing MTAs, before releasing samples from the biorepository.

## 4.0 DEFINITIONS

See Glossary of Terms.

## 5.0 PROCEDURE

### 5.1 Completion of the MTA

- 5.1.1 Once an application for biospecimen has been received, contact the researcher to complete a Sample Request Application Form, and a Material Transfer Agreement .
- 5.1.2 The appointed Biorepository Review Committee must review the application, prior to submission to the REB/IEC.
- 5.1.3 Upon approval of release by the REB/IEC, ensure that the MTA is signed by the researcher, and the appropriate representative from the biorepository.
- 5.1.4 The MTA should ideally contain the following elements:
  - Clarification about custodianship of the samples
  - Outline of the research project
  - Biospecimen being supplied 'as is' with no representations or warranties, unless otherwise specified by the MTA
  - Potential for biospecimen to have unknown characteristics or carry infectious agents
  - Restrictions on the use of the biospecimen/clinical data if any
  - Privacy and Confidentiality principles that must be adhered to
  - Instructions about return, retention or disposal of unused biospecimen if applicable
  - Specific conditions for publication of research results if any
  - Specific conditions for sharing data if any
  - Specific conditions for managing intellectual property if any
  - Specific conditions about compensation for material transfer if relevant
  - If possible, a list of samples (identification codes) to be released to researcher (if the list is not finalized at the time of signing of the MTA, a complete list should be appended to the form before sample release)
  - Specify if annotating data is being included
- 5.1.5 Do not supply biospecimen to a third party without the approval of the REB/IEC and the signing of a MTA.
- 5.1.6 Release of biospecimen to academic or commercial researchers may warrant the use of tailored or specific MTAs.
- 5.1.7 The signed MTAs are valuable documents for tracking material utilization. Ensure that MTAs are documented and signed copies filed.

5.1.8 Retain signed copies of MTAs securely for audit purposes or to handle complaints.
